FINANCIAL TRANSACTION DASHBOARD — KEY INSIGHTS

TRANSACTION OVERVIEW

The dashboard records approximately 12K total transactions, with a total quantity of 121K and an average transaction amount of 7.69K.

TRANSACTION PERFORMANCE

Transaction amounts vary across countries, transaction types, and currencies, highlighting differences in transaction activity across markets.

TOP PAYMENT METHOD

Transactions are distributed across several payment methods, including Credit Card, UPI, Debit Card, Net Banking, PayPal, and Wire Transfer.

CUSTOMER INSIGHTS

The dashboard compares customer activity across segments and quarters, helping identify patterns in customer transactions over time.

PRODUCT ANALYSIS

Transaction counts vary across product categories, while the supplier analysis shows differences in the number of products supplied by each supplier.

TRANSACTION STATUS

Transactions are classified as Completed, Pending, and Failed. Monitoring these statuses can help identify unsuccessful transactions and improve payment performance.

GEOGRAPHICAL ANALYSIS

The country-level map displays transaction activity across different locations, helping identify markets with higher transaction amounts and volumes.

OVERALL FINDING

The dashboard provides an overview of transaction performance, customer activity, payment methods, product categories, and geographical distribution. Monitoring transaction statuses and comparing performance across markets can support better financial decision-making.
